

Benefits of TEA 10 Cloud

Deploying TEA in a hosted environment

What is cloud computing?

Cloud computing is the on-demand delivery of computer power, database, storage, applications, and other IT resources via the internet with pay-as-you-go pricing. Whether you are using it to run applications or to support business critical operations, a cloud services platform provides rapid access to flexible and low cost IT resources.

CommonGoals offers a state-of-the-art hosted environment for TEA 10 using the Microsoft Azure hosting platform so that your organization can focus on your clients and not on IT. We have multiple data centers so whether you are in the US or Canada, your data will reside in your respective region ensuring you are in compliance with your personal privacy legislation.

Deploying TEA 10 Cloud is your best method to ensure you are optimizing your time while maintaining the best possible infrastructure, all while enjoying the following benefits:

Flexibili-TEA	Scalabili-TEA
<p>Cloud-based services such as TEA are ideal for growing your organization. With TEA10 Cloud, you have a worry-free environment that allows your organization to meet expanding demands for new employees, resources and infrastructure without any capital expenditures while maintaining the best possible infrastructure for your growing organization.</p>	<p>TEA 10 Cloud allows for your organization to scale up infrastructure resources without needing to implement or advise of those capacity requirements. When you need more resources, our servers automatically load-balance those requirements so that you always have optimum performance providing the highest rate of efficiency.</p>
Securi-TEA	Mobili-TEA
<p>TEA 10 Cloud provides the highest level of security with industry standard data encryption, complete data redundancy, automatic backups and impenetrable infrastructure. Rest assured there will be no breach of your data and all client and sensitive personal information will remain private. Most organizations operating in a local environment do not maintain their internal infrastructure effectively (operating system updates, patching, anti-virus, firewall, etc.) leaving themselves highly vulnerable to potential cyberattacks.</p>	<p>One of the greatest advantages of TEA 10 Cloud is the ability to provide your team with the ability to work remotely. This allows for organizations that are geographically diverse to centralize TEA in a cloud-based environment allowing for multiple offices and remote workers to always have access to the reporting and functionality to work effectively anywhere, anytime. TEA 10 Cloud allows for increased collaboration for your team ensuring communication is flowing and your organization growing.</p>
Simplici-TEA	Integri-TEA
<p>For most customers, TEA is an integral part of their business and is responsible for managing a significant portion of their data reporting requirements. TEA 10 Cloud makes the deployment and maintenance of the software simple. We complete all server updates, patches, software updates, data backups, data restores so you can simply use the software hassle-free knowing that your data and environment have the highest level of integrity.</p>	<p>TEA 10 Cloud provides the highest level of data integrity providing peace of mind that it is always safe, secure and fully managed by a reliable team of professionals. Knowing that no matter what tragedy may strike your data and customer information is never affected. Disaster recovery is not an insurmountable task when all of your data is cloud-based, backed-up and ready for deployment in hours.</p>

From our perspective, as a trusted partner and service provider, cloud computing is one of the most critical and economical methods of ensuring you never have to suffer through data loss, cyber-attacks or downtime related to internal infrastructure and lack of IT resources.
